## PROJECTS

**Title: Secure File Sharing System Using Data Mining**
**Technologies**: Flask (Python), HTML, CSS, Anomaly Detection, QR Code–based access, Time-based unique keys.
**Role**: Backend Developer & Application Logic Contributor
Built a secure Flask-based file sharing system using QR code authentication, time-limited access keys, and anomaly detection with Pandas and machine learning techniques.

**Title: Digital Image Tamper Detection Using CNN**
**Technologies**: Python, TensorFlow, OpenCV, NumPy, Pandas
**Role**: Deep Learning Project Contributor
Image tampering such as copy-move and splicing is commonly used to manipulate images. These manipulations are often difficult to detect with the human eye, so this project uses CNN models to automatically identify tampered images.
