

MANASANI POOJA

Hyderabad, Telangana • 9704904594 • Poojareddy2286@gmail.com • linkedin.com/in/pooja-manasani03 • github.com/ManasaniPooja

PROFESSIONAL SUMMARY

Recent B.Tech graduate in CSE (Data Science) with hands-on experience in Python Full Stack Development and Data Analytics. Proficient in building responsive web applications using React, Django, HTML/CSS, and JavaScript. Skilled in data analysis with NumPy, Pandas, and Matplotlib, and experienced in machine learning techniques such as CNN, regression, and clustering. Certified in Power BI and Data Visualization with a strong foundation in OOP, database integration, and problem-solving.

EDUCATION

B.Tech – CSE (Data Science) | Bharat Institute of Engineering and Technology, Hyderabad 2021 – 2025

Intermediate – MPC | Narayana Junior College 2019 – 2021

Secondary School Certificate | Sri Kakatiya Talent School 2018 – 2019

TECHNICAL SKILLS

Languages: Python, Java (fundamentals)

Frontend: HTML, CSS, JavaScript, React, Bootstrap

Backend: Django, Flask

Data & ML: NumPy, Pandas, Matplotlib, TensorFlow, OpenCV, Scikit-learn

Databases: Oracle SQL

Tools: Power BI, Excel, Figma, Git/GitHub

PROJECTS

Secure File Sharing System Using Data Mining

Technologies: Flask (Python), HTML, CSS, Pandas, Machine Learning, QR Code Authentication

- Engineered a secure Flask-based file sharing platform with QR code authentication and time-limited one-time access keys.
- Implemented anomaly detection using Pandas and ML techniques to flag suspicious access patterns and unauthorized sharing attempts.
- Designed the full application logic and backend architecture, ensuring end-to-end data security.

Digital Image Tamper Detection Using CNN

Technologies: Python, TensorFlow, OpenCV, NumPy, Pandas

- Built a deep learning pipeline using CNN models to automatically identify image tampering techniques including copy-move and splicing.
- Preprocessed datasets with OpenCV and NumPy, achieving reliable detection of manipulations invisible to the human eye.
- Contributed to model training, evaluation, and fine-tuning to improve classification accuracy.

INTERNSHIPS & TRAINING

Data Science Intern | CodSoft

Jul 2024 – Aug 2024

- Analysed customer behaviour using predictive analytics — regression, clustering, and decision trees — on real-world datasets.
- Performed exploratory data analysis (EDA) to identify patterns and trends across large, unstructured datasets.
- Delivered working projects: Titanic Survival Prediction, Sales Forecasting, and Iris Flower Classification.

Python Programming Intern | VaultofCodes

Sep 2024 – Oct 2024

- Developed Python-based solutions, strengthening proficiency in scripting, OOP, and data handling.

Data Science with Python | [Eduviz](#)

Mar 2025 – May 2025

- Completed advanced training in data science methodologies, Python libraries, and real-world analytics applications.

CERTIFICATIONS

- Java – Mastering the Fundamentals | Scaler
- Data Analytics and Visualization Job Simulation | Accenture North America (Forage)
- Data Science Job Simulation | Forage
- Data Visualization | Tata Group (Forage)
- Power BI Job Simulation | PwC Switzerland (Forage)
