

COVER LETTER

Dear Hiring Manager,

I am writing to express my interest in the Tech Analyst – Global Contact Center ITSD position at Deloitte USI. I am a recent B.Tech graduate in Computer Science (Data Science) with a strong foundation in Python, web development, and data analytics, and I am eager to contribute to Deloitte's technology-driven support environment.

During my academic and internship experiences, I developed hands-on skills in troubleshooting, backend development, and data-driven problem solving. I have built a Secure File Sharing System using Flask, integrating QR-based authentication and anomaly detection, which strengthened my understanding of system reliability and user-focused solutions. Additionally, my work in data analysis using Python libraries such as Pandas and NumPy has enhanced my ability to analyse issues, identify patterns, and deliver efficient resolutions.

Through internships in data science and Python development, I gained exposure to real-world problem solving, debugging, and handling technical tasks efficiently. I am particularly drawn to this role as it combines technical support, communication, and analytical skills—areas where I am confident in my ability to perform and grow.

I am a quick learner with strong problem-solving abilities, and I am enthusiastic about working in a dynamic, client-focused environment like Deloitte. I am confident that my technical foundation and willingness to adapt will allow me to contribute effectively to your team.

I would welcome the opportunity to discuss how my skills align with your requirements. Thank you for your time and consideration.

Sincerely,

MANASANI POOJA
